

Principles of Contextual Inquiry

There are 4 overall principles of contextual inquiry:

Context

Interviews are conducted in a natural setting for the activities. The researcher watches users do their own tasks and discusses any artifacts they generate or use with them. The researcher may also ask about and collect notes on past events when they are relevant to the project focus.

Partnership

User and researcher collaborate to understand the user's work. The interview alternates between observing the user as they work and discussing what they did and why.

Interpretation

The researcher shares interpretations and insights with the user during the interview, particularly if any significant re-wording has taken place or if the insights do not directly follow from what the user said or did. The user may expand or correct the researcher's understanding.

Focus

The researcher steers the interaction towards topics which are relevant to the team's scope. Note that significant steering may be needed for some participants.

About the Interaction Design Foundation

INTERACTION DESIGN
FOUNDATION

Founded in 2002, the Interaction Design Foundation (IDF) is on a mission to provide accessible and affordable design education to people across the world. We provide open-source educational materials as well as online, self-paced UX Design courses. Through taking our courses, you'll benefit from course materials developed by leading practitioners and academics from top-tier universities like Stanford University and MIT. [Learn more about the IDF](#)

How learning at the IDF works

Attend lessons at your own pace

Learn from UX experts and professors, from anywhere and at anytime

Network online and offline

Discuss with your peers in your courses, and meet with them in your city

Advance your UX career

Get an industry-trusted Course Certificate to add to your résumé
