

# GOV flow kit for Google Drawing

Work in progress

## How to use this kit

A few things worth knowing:

- This canvas is 170cm wide by 90cm high
- Each component (screen plus title) is 10cm by 12cm

### Suggested steps

1. [Make a copy of this Google Drawing](#) and save it for yourself
2. Use **File > New > Drawing** to make a new one
3. Use **File > Page size** to set your **Custom** canvas size you think you'll need in cm (You can resize it later, but use the Grab handle bottom right otherwise all your components will be resized to)
4. Use **View > Guides > Edit guides** to add vertical guides 15cm apart
5. Use **View > Guide > Edit guides** to add horizontal guides - the ones here are 20cm apart
6. Copy and paste the components you need from your copy to your new drawing

## About this kit

- The inspiration for this comes from the brilliant [GOV Flow kit for Sketch](#) by [Charles Reynolds-Talbot](#)
- I really like Sketch, but others in my team don't use it and want to put flows together too
- All feedback is very welcome here in Comments or Twitter
- If you use it you can let [@nicprice](#) know on Twitter
